

VERO BEACH MUNICIPAL POWER PLANT

DATE: August 1, 2008

TO: John Selig
Business Operations Manager

FROM: Thomas Clark
Power Plant Projects Coordinator

SUBJECT: Architecture Metals Job Performance

I wanted to thank you John for the professional attitude you demonstrated as Project Manager during the installation of the flood proof doors, panels, and louvers here at Vero Beach Municipal Power Plant.

As with any job there were a few discrepancies between the Power Plant and Architecture Metals, all being in the contract language, not the quality of material and workmanship.

You always made yourself available for these problems and assisted in the solution for all parties involved. Anytime I called for information you had the answer I needed and always made yourself available.

As Projects Coordinator here at the Power Plant I am well aware of schedules and deadlines. You kept me informed of the progress of the job, any problems that developed, and always informed the Plant when you would be on site.

It was a pleasure working with you on this project and seeing it to completion.
